SUBJECT: Duwamish River Sediment Collection

REMARKS: ☐ Urgent ☒ For your review ☒ Reply ASAP ☐ Please comment

Dear Operator, Owner, or Lessee,

Splits and/or data results of the collected samples from the Duwamish River are to be provided to property owners for *their submerged lands only*. We do not have complete or accurate information on submerged lands ownership or control. In order to assist us in determining who should get what sample correctly, we request that you assert the boundaries of subsurface sediments that you believe that you own (operate from or lease).

Please mark the following trace of the Duwamish River with a bold line to indicate the submerged area which you believe you have control of or title to. Please be as specific as you can (i.e., indicate if the area is an intertidal area or how many feet out into a slip the area may extend, etc.).

Thanks very much,

Marcia Bender

P.S. The sampling will be up in your area in mid. October (roughly).
